

 **DOUBLE-H**[®] *Boots* Easy Fit Guide

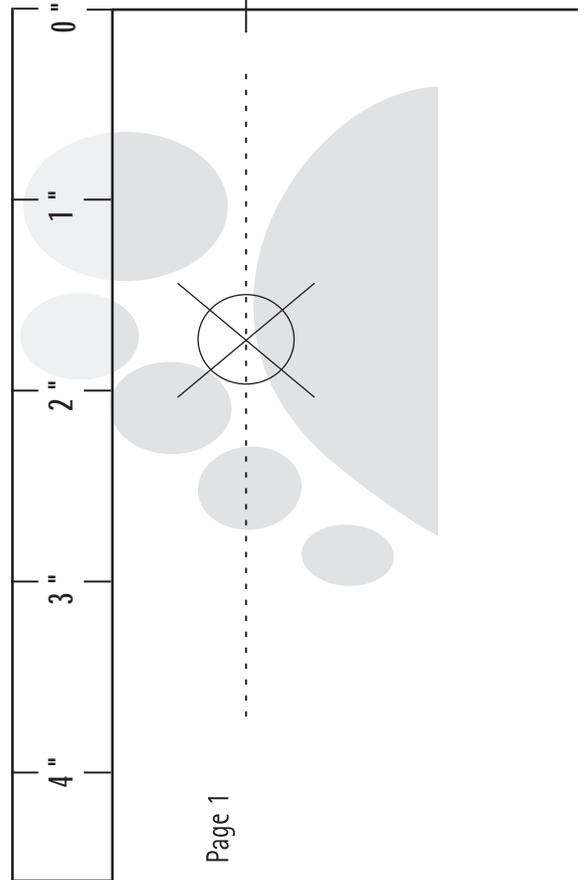

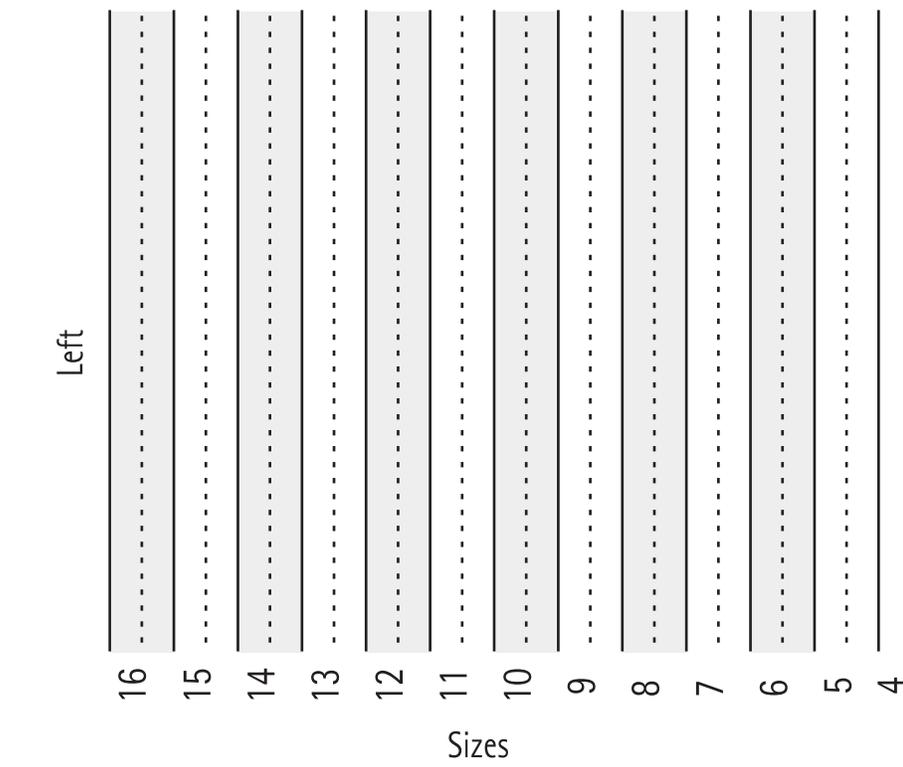

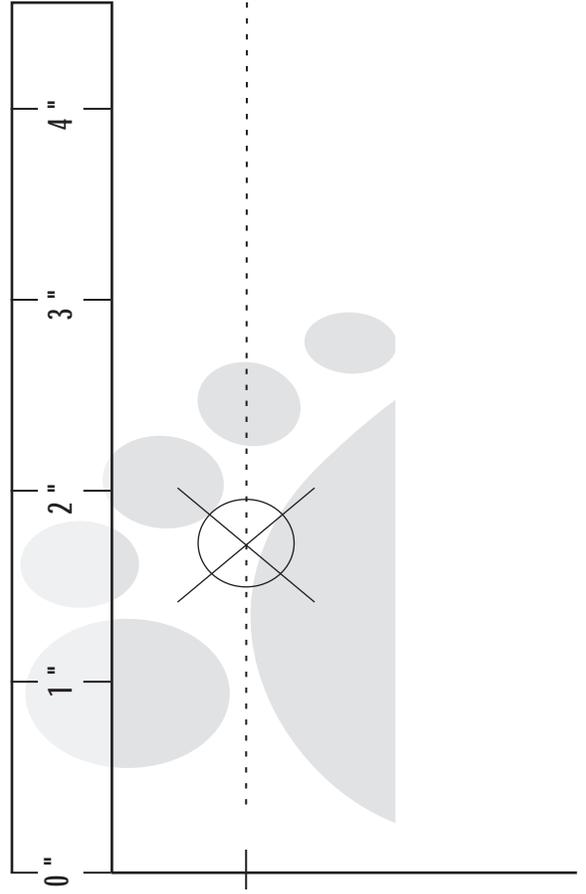

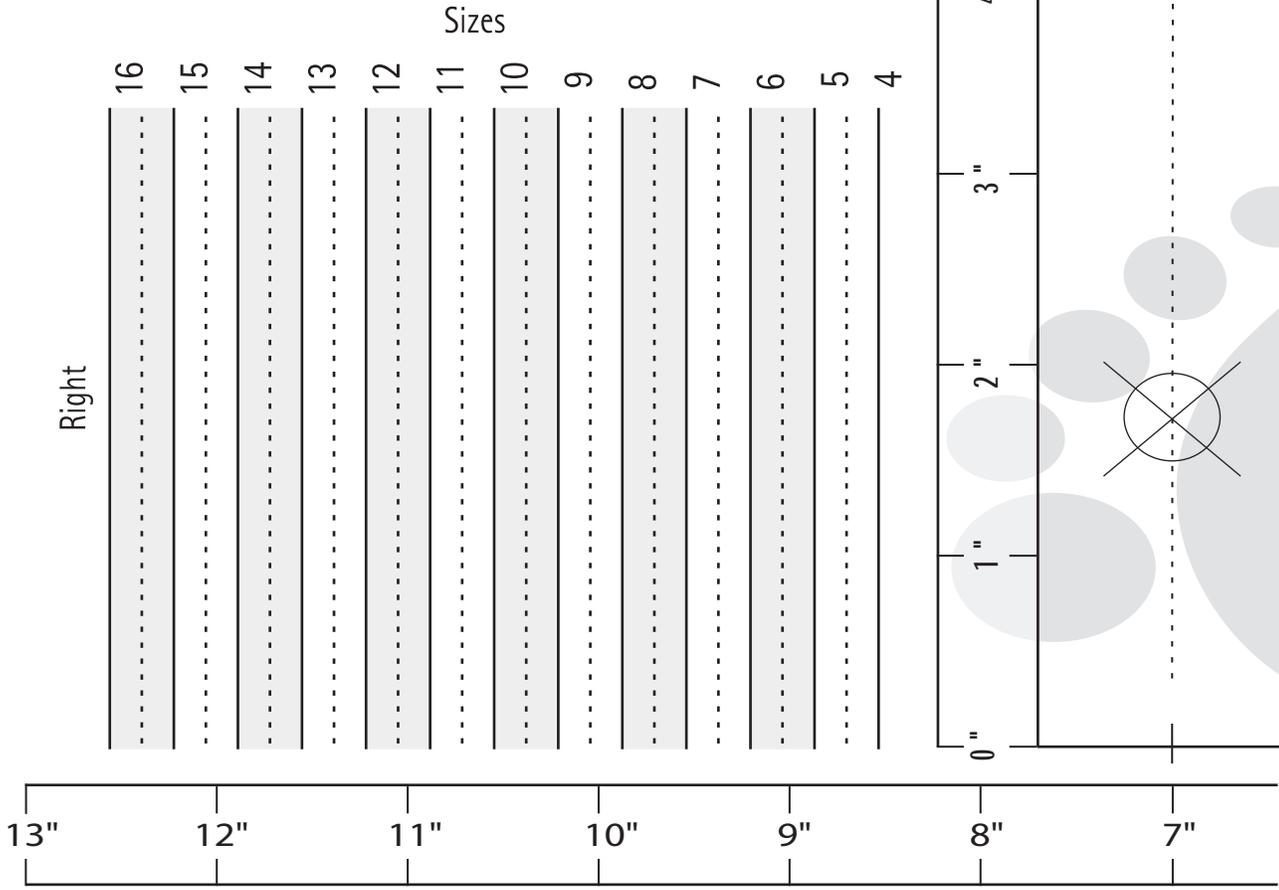

Here Are Your Instructions:

1. Fold PAGE 2 of the sizing chart along the dotted line.
2. Align PAGE 1 and PAGE 2 of the sizing chart along the dotted lines so that the foot sketch, dotted lines and alignment crosshairs align properly.
3. Tape PAGE 1 and PAGE 2 together along the dotted lines.
4. Take a ruler and measure the center "inches column" to make sure that the pages printed properly and you taped the pages together accurately. Twelve inches on the shoe sizing chart should equal twelve inches on your ruler.

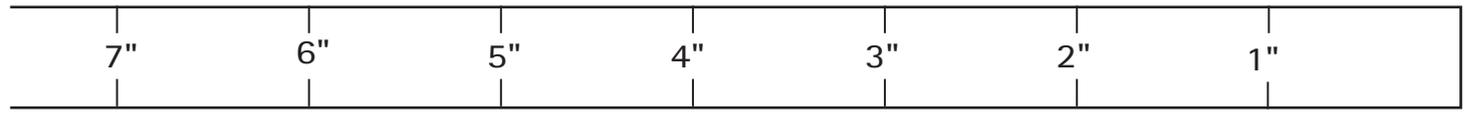

NOTE: If the pages did not print out accurately make sure your printer's "fit to page" option is NOT SELECTED and print the sizing chart again.

Measure Both Feet:

1. Place the finished sizing chart on a hard surface/floor.
2. Align the outermost part of your heel with the bottom line of the sizing chart.
3. Flatten your foot by shifting your weight forward to ensure an accurate reading.
4. Identify the size. Then, do the same with your other foot to ensure correct size.
5. Always choose the larger size of your two feet.
6. Write down your foot size for future reference.
